Circlo

About this Product

Circlo is a social calendar app that helps users plan hangouts, invite friends, vote on available times, sync calendars, and manage social availability in one place. The app supports onboarding, contact import, home screen widget installation, event creation, RSVP, polls, reminders, and activity tracking.

My Approach & Process

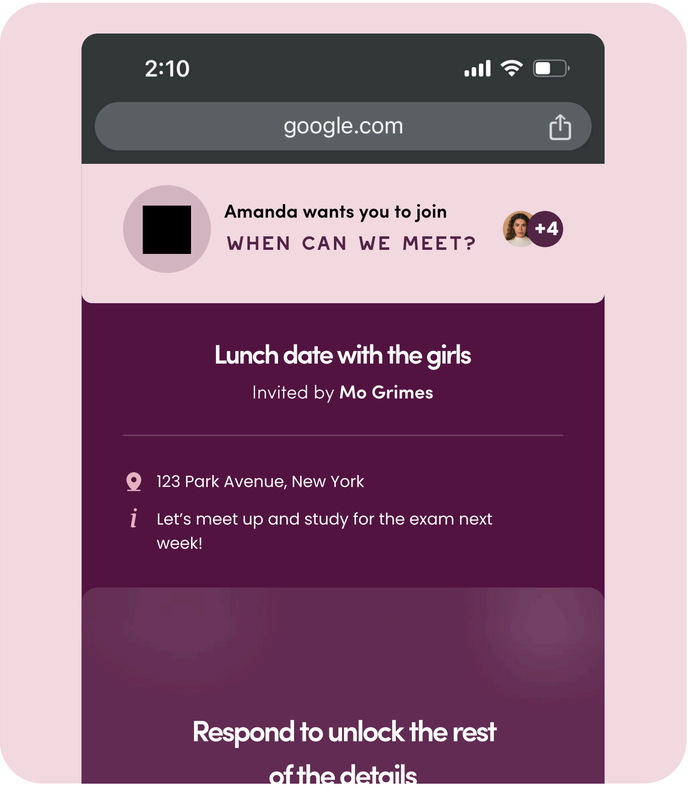

I designed the end-to-end mobile experience from onboarding to event creation and RSVP flows. I mapped the user journey, created key screens in Figma, structured the onboarding flow, designed calendar views, invite flows, contact import, settings, and event management screens.

Why It Works

The flow is simple and action-focused. Users can quickly create plans, invite friends, check availability, and respond without confusion. The app also supports both Circlo users and non-users through public links and text-based invites.

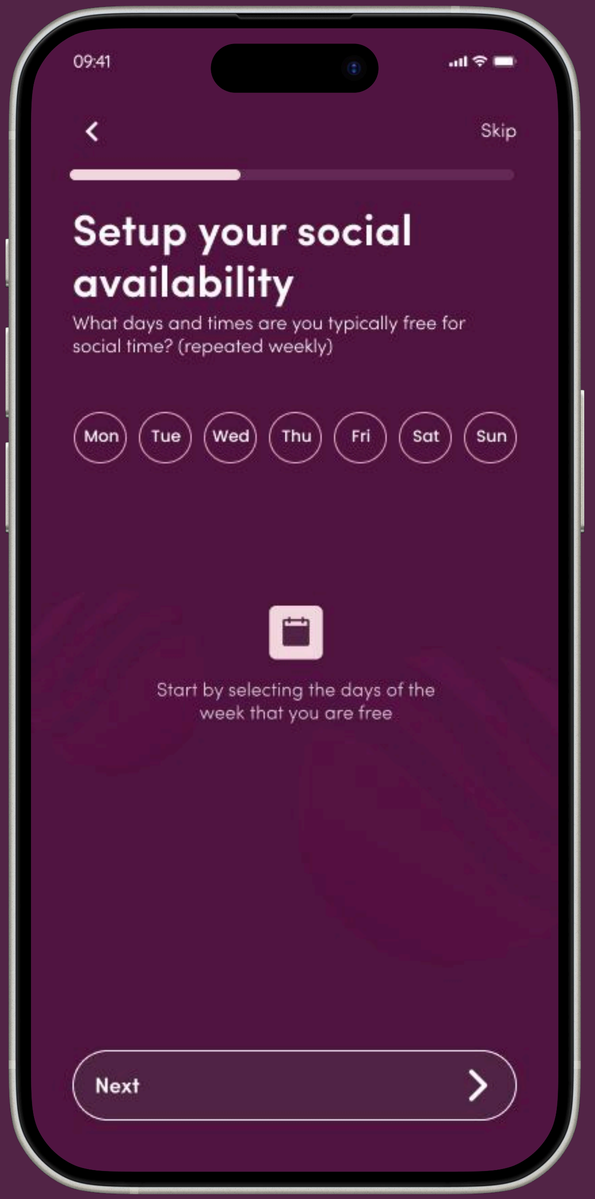

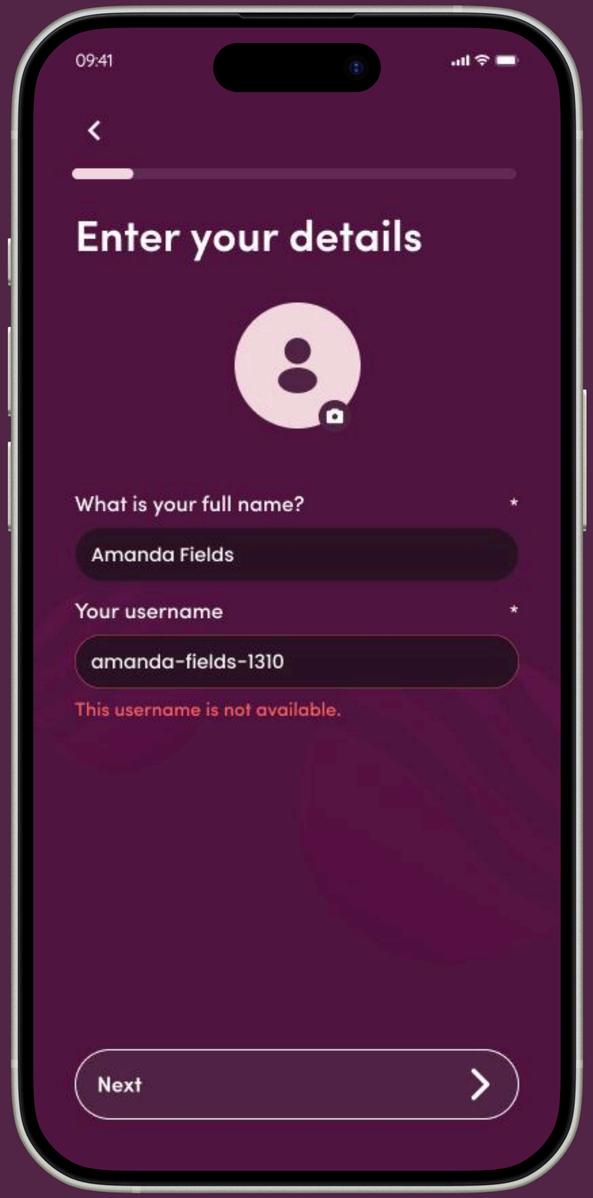

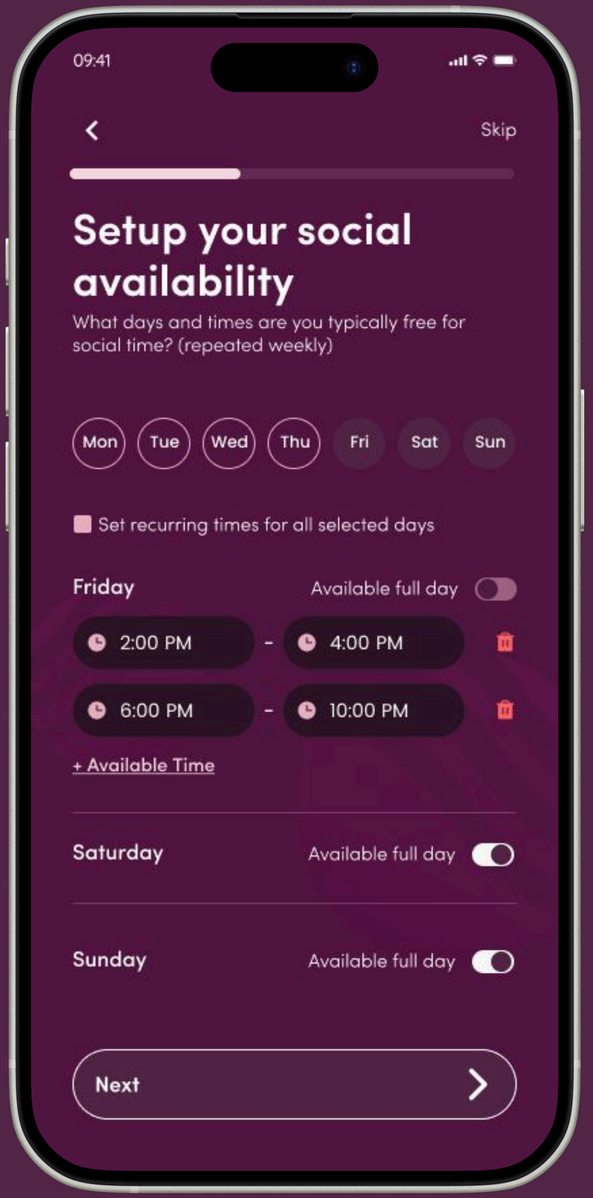

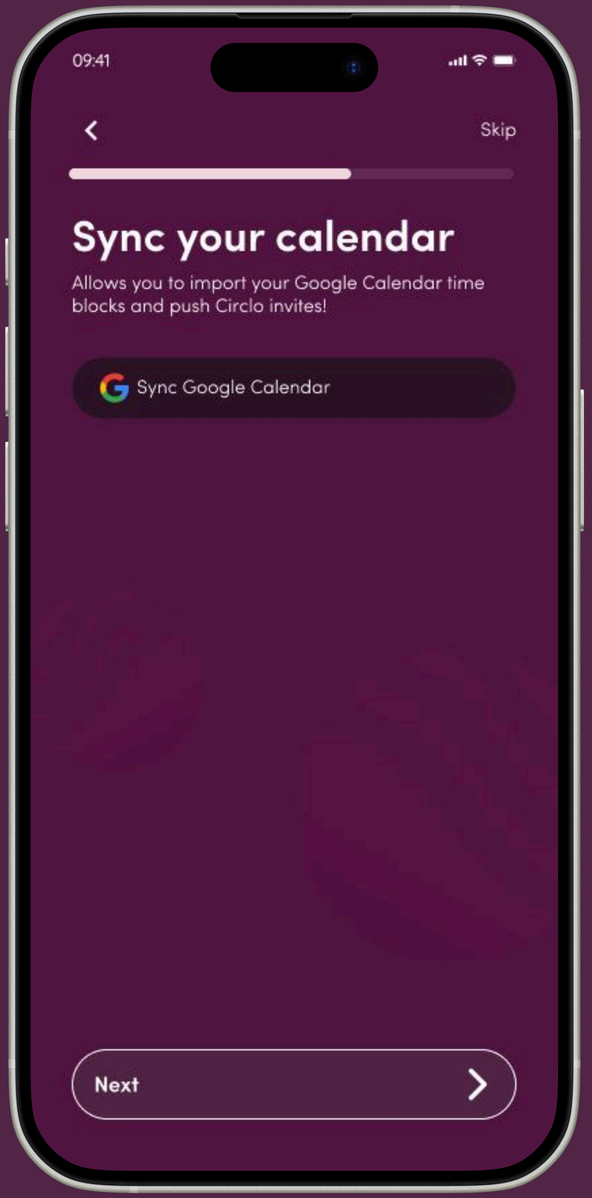

What Didn’t Work

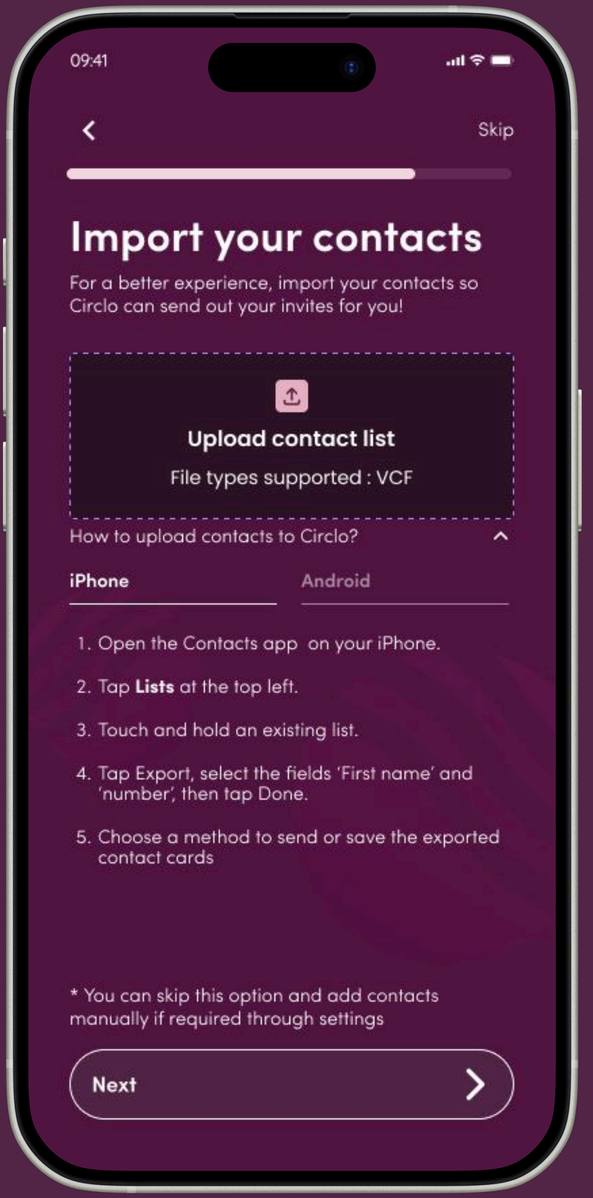

Some flows became very long because onboarding, calendar sync, contact import, event creation, polls, and RSVP states all needed separate screens. Managing many edge cases made the design complex, especially for guest users, reminders, empty states, and overlapping time blocks.

Import your contacts
For a better experience, import your contacts so Circlo can send out your invites for you!
Upload contact list
File types supported : VCF
How to upload contacts to Circlo?
iPhone
Android
1. Open the Contacts app on your iPhone.
2. Tap Lists at the top left.
3. Touch and hold an existing list.
4. Tap Export, select the fields 'First name' and 'number', then tap Done.
5. Choose a method to send or save the exported contact cards
* You can skip this option and add contacts manually if required through settings

Team

My role was Product Designer. I worked on UX flow, UI design, interaction states, onboarding structure, event creation, RSVP experience, and design handoff for the Circlo product.
