ABOUT ME

I design digital products that are fast to understand, easy to use, and built to scale.

Over 6+ years, I've shipped design work across three very different worlds: at INDEX Holding (Dubai), I own products end to end — designing event websites, mobile apps, and event management dashboards for large-scale exhibitions and conferences across multiple subsidiaries. Before that, I designed consumer mobility and food delivery experiences at PickMe — Sri Lanka's leading ride-hailing platform with millions of users — and B2B SaaS products spanning gaming, fitness, automotive, and edtech at Rootcode Labs.

What sets me apart is how I work, not just what I make. I've integrated AI into every stage of my design process — building MCP (Model Context Protocol) workflows, prototyping with Claude and Codex, and running design-to-code experiments that compress delivery timelines without compromising craft. I don't treat AI as a novelty; I treat it as part of the toolchain.

My work covers the full product cycle: user research and workshops, wireframes and design systems, high-fidelity UI, and close collaboration with engineers through handoff and beyond.

SELECTED EXPERIENCE

UI/UX Designer
INDEX Holding
Nov 2024 – Present
Dubai, UAE

Design lead for platform products across the group's subsidiaries — event websites, mobile apps and event management dashboards for large exhibitions and conferences. Built and maintain the shared design system, led concept design for Aiva, an AI-powered super app, and wrote the internal guide on structuring Figma files for AI-assisted code generation.

Product Designer
PickMe
Jun 2023 – Oct 2024
Colombo, Sri Lanka

Designed consumer mobile experiences for one of Sri Lanka's largest ride-hailing and food delivery platforms. Redesigned the PickMe Food checkout flow end to end, ran user interviews and workshops with product and engineering, and built accessibility review into every release.

UX Designer
RootcodeLabs
Dec 2021 – May 2023
Colombo, Sri Lanka

Owned UX for B2B SaaS client products across edtech, automotive, fitness and gaming, from discovery and information architecture to high-fidelity UI. Ran usability testing and presented design rationale to client stakeholders.

Associate UI/UX Designer
RootcodeLabs
Dec 2020 – Dec 2021
Colombo, Sri Lanka

Produced sitemaps, IA diagrams, usability reports and analytics summaries for client projects, and standardised the team's design documentation.

Associate UI/UX Designer
Expert Republic
Mar 2020 – Dec 2020
Colombo, Sri Lanka

Led UI design for the iOS, Android and web platforms through to launch.

Trainee UI Engineer
Ellipsis
Dec 2019 – Mar 2020
Colombo, Sri Lanka

Built responsive front-end interfaces using HTML, CSS and Bootstrap.

RECENT WORK

Event PM Module
INDEX Holding
A three-panel project management workspace with multiple view modes and a team workload heatmap, benchmarked against Linear, ClickUp and Asana.

Webinar Backstage Portal
INDEX Holding
Designed and built the high-fidelity portal for go-live controls, recording sync and recordings management.

More work
Portfolio
Case studies across events, mobility and AI products.
